

Childrens' Tables & Boot Storage

Completed September 2011

Eagle Scout - Nick McNiel

Nick McNiel carefully listened to the needs of the WATER Center staff regarding both the Center' young visitors and staffs' need for additional storage. He chose designs that would fit within the space and architectural style of the facility. Nick created two childrens tables, each with six storage drawers for puzzles, puppets, and more. Behind the scenes, Nick installed three boot storage racks for the rubber boots used by staff and volunteers.
